MISSION

To build a strong engineering service company with focus and passion to promote effectiveness and professionalism in our industry. Our mission is geared towards developing long-term relationship with clients and build a strong corporation that is sensitive, responsive and innovative during providing services and doing business.

We carry out our mission with great commitment, professionalism, service and loyalty. We are dedicated to the provision of exceptional quality and cost-effective service in every project we undertake.

We maintain an attitude and atmosphere that breeds outstanding employees' productivity/cooperation and we provide proper resources, facilities, guidelines, and state-of-the-art equipment to allow our employees to achieve successful project executions.

Think
Excellence.

VISION

To be the oil and gas service solutions provider of choice in Africa.

CORE VALUES

Our core values of excellence, impeccable integrity and utmost professionalism demonstrate our highest priorities and fundamental driving forces. These are our most deeply held beliefs and reflect how we interact with our customers, supplier environment, communities and employees.

Delivering support services to meet growing worldwide demand in the energy industry.

EPCI Project Management

- Project management consulting.
- Effective management of the project budget in such a way as to ensure auditability and the optimal use of funds in support of the project objectives.
- Project start up to close out procedures are implemented.
- Guarantee achievement or improvement on P & L forecasts.
- Lessons learnt from the project are captured and ensure accountability (technically, commercially and contractually) during Tender and Project Phases.
- We establish and provide leadership for the project teams (including, as necessary, internal staff) that would be tasked with delivering on such aspects of the project as product selection, product qualification, regulatory approvals, etc.
- Determine if the project is viable and advise on any conditions needed to be met before investment.
- Revenue projections, Regulatory requirements, Development costs and Key project milestones and deliverables are strictly maintained.
- Engineering Projects Design, Consultancy, Commissioning & Handing Over.

Operations, Maintenance and Procurement Solutions

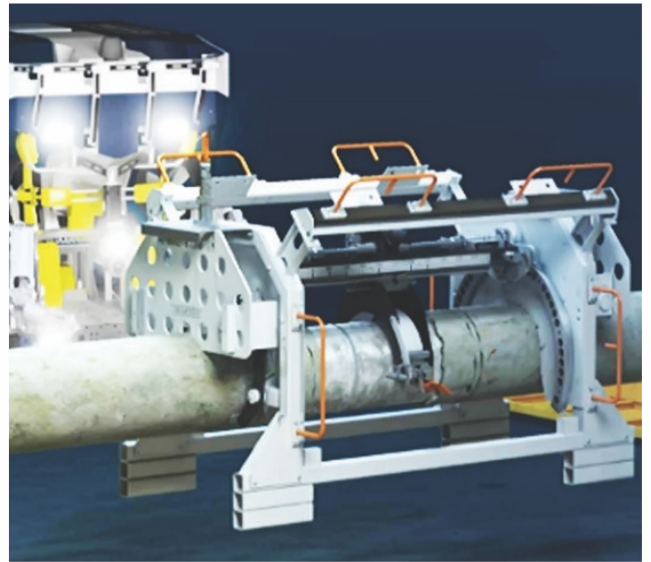

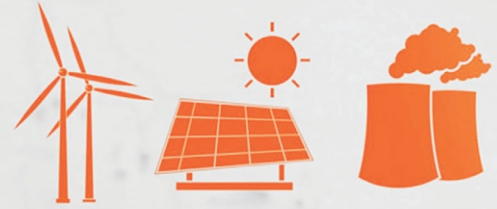

OCTA ENERGY focuses on customers to whom the operation of the facility, equipment and infrastructure is crucial to the success of their surface production operation. Through a network of international partners, we provide differentiated and innovated production equipment management and maintenance solutions that drive quality, efficiency, and reliable means to superior results.

Recruitment and Outsourcing Solutions

The concern of many companies in the manufacturing, oil & gas, telecoms, engineering service companies today is the challenge of managing a large workforce and the attendant costs, logistics and time involved in managing the staff.

Our objective is to take on the challenge and responsibility of managing some categories of your staff off your organization thereby providing the organization the time to focus on realizing the company's core objectives.

Our outsourcing services include

- Drafting of contracts of employment in line with the Nigerian labour laws and client/industry peculiarities
- Conducting background and Pre-employment medical checks on candidates before commencement of employment or confirmation of the candidates.
- Payroll management and administration

- Group life assurance policy arrangements
- Pension contribution and payment management
- Procurement and management of health insurance policies for outsourced staff.

Our recruitment services include; Contingency recruitment, deployment and management of all levels of the categories of personnel listed below either for short or long terms assignments:

- Skilled
- Semi-skilled
- Unskilled
- Professionals

We have agreements in place with international alliance partners which give us access to a global talent pool.
